

OUR RESEARCH PORTFOLIO AT A GLANCE

2020 – 2021 Fiscal Year

REGIONAL NODES

BC	AB	PRAIRIES	ON	QC	ATLANTIC
\$3.3M INVESTED	\$381K INVESTED	\$300K INVESTED	\$5.6M INVESTED	\$1.4M INVESTED	\$574K INVESTED
11 PROJECTS*	4 PROJECTS*	2 PROJECTS*	26 PROJECTS*	7 PROJECTS*	3 PROJECTS*
91 RESEARCHERS	27 RESEARCHERS	15 RESEARCHERS	160 RESEARCHERS	71 RESEARCHERS	21 RESEARCHERS
17 INSTITUTIONS	11 INSTITUTIONS	4 INSTITUTIONS	23 INSTITUTIONS	22 INSTITUTIONS	9 INSTITUTIONS

*Many of our projects are pan-Canadian in nature and their research is conducted in more than one region. Thus, project totals shown here should not be added up, as their sum will equal more than 44, the total number of projects we fund.

FUNDING PROGRAMS

Program	Investment	Projects	Researchers
Terry Fox New Frontiers Program Project Grants	\$6.9M	16	244
Terry Fox Translational Research Program	\$2.2M	5	122
Terry Fox New Investigator Award	\$1.3M	12	26
Marathon of Hope Cancer Centres Network Pilots	\$1.1M	3	88
Other Programs	\$50K	1	1
Total	\$11.6M	44	385*

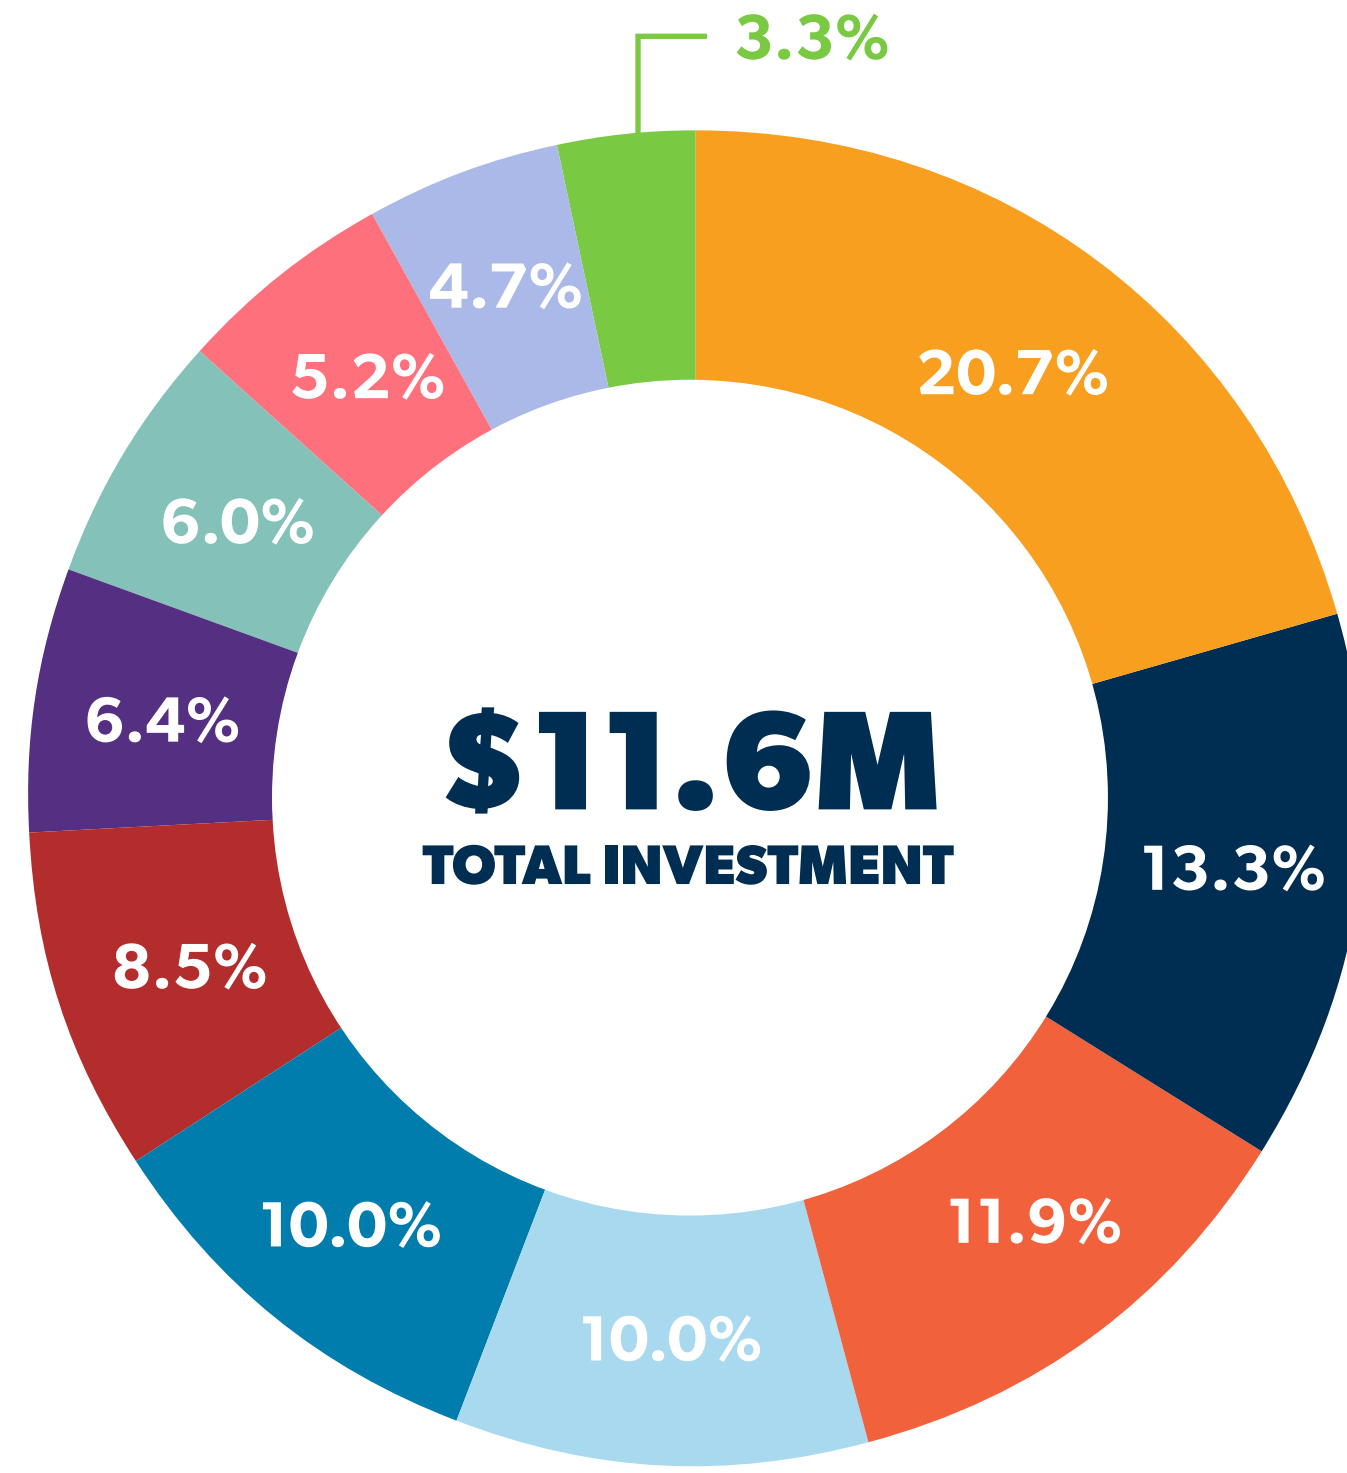

*A number of researchers work on several projects across program types. While these individuals may be counted in more than one program type, the total number displayed at the bottom reflects the individual number of researchers we fund: 385

CANCER TYPES†

Investment by Cancer Type

Blood	\$2.4M
Other*	\$1.5M
Pediatric & Young Adult	\$1.4M
Prostate	\$1.2M
Brain	\$1.2M
Breast	\$979K
Pancreatic	\$745K
Ovarian	\$690K
Rare Cancers	\$602K
Lung	\$544K
Colorectal	\$386K

*This category includes our investment in projects that have non-specific cancer types as well as a cumulative total of our investment in cancer types that received less than 4% of our annual funding, including gastrointestinal cancers, head and neck cancers, melanomas, liver and sarcomas.

Number of Projects by Cancer Type

Types	Projects	Types	Projects
Brain	10	Colorectal	3
Blood	8	Head & Neck	3
Breast	7	All Cancers	2
Pediatric & Young Adult	6	Melanoma	1
Prostate	4	Sarcoma	1
Pancreatic	4	Gastrointestinal	1
Lung	4	Liver	1
Ovarian	3	Rare Cancers	1

†Our projects are interdisciplinary by design and often apply to more than one cancer type. Our investment per cancer type is an estimation. The interdisciplinary nature of our projects also means that the number of projects by cancer type should not be added, as their sum will be more than 44, the number of projects we currently fund.

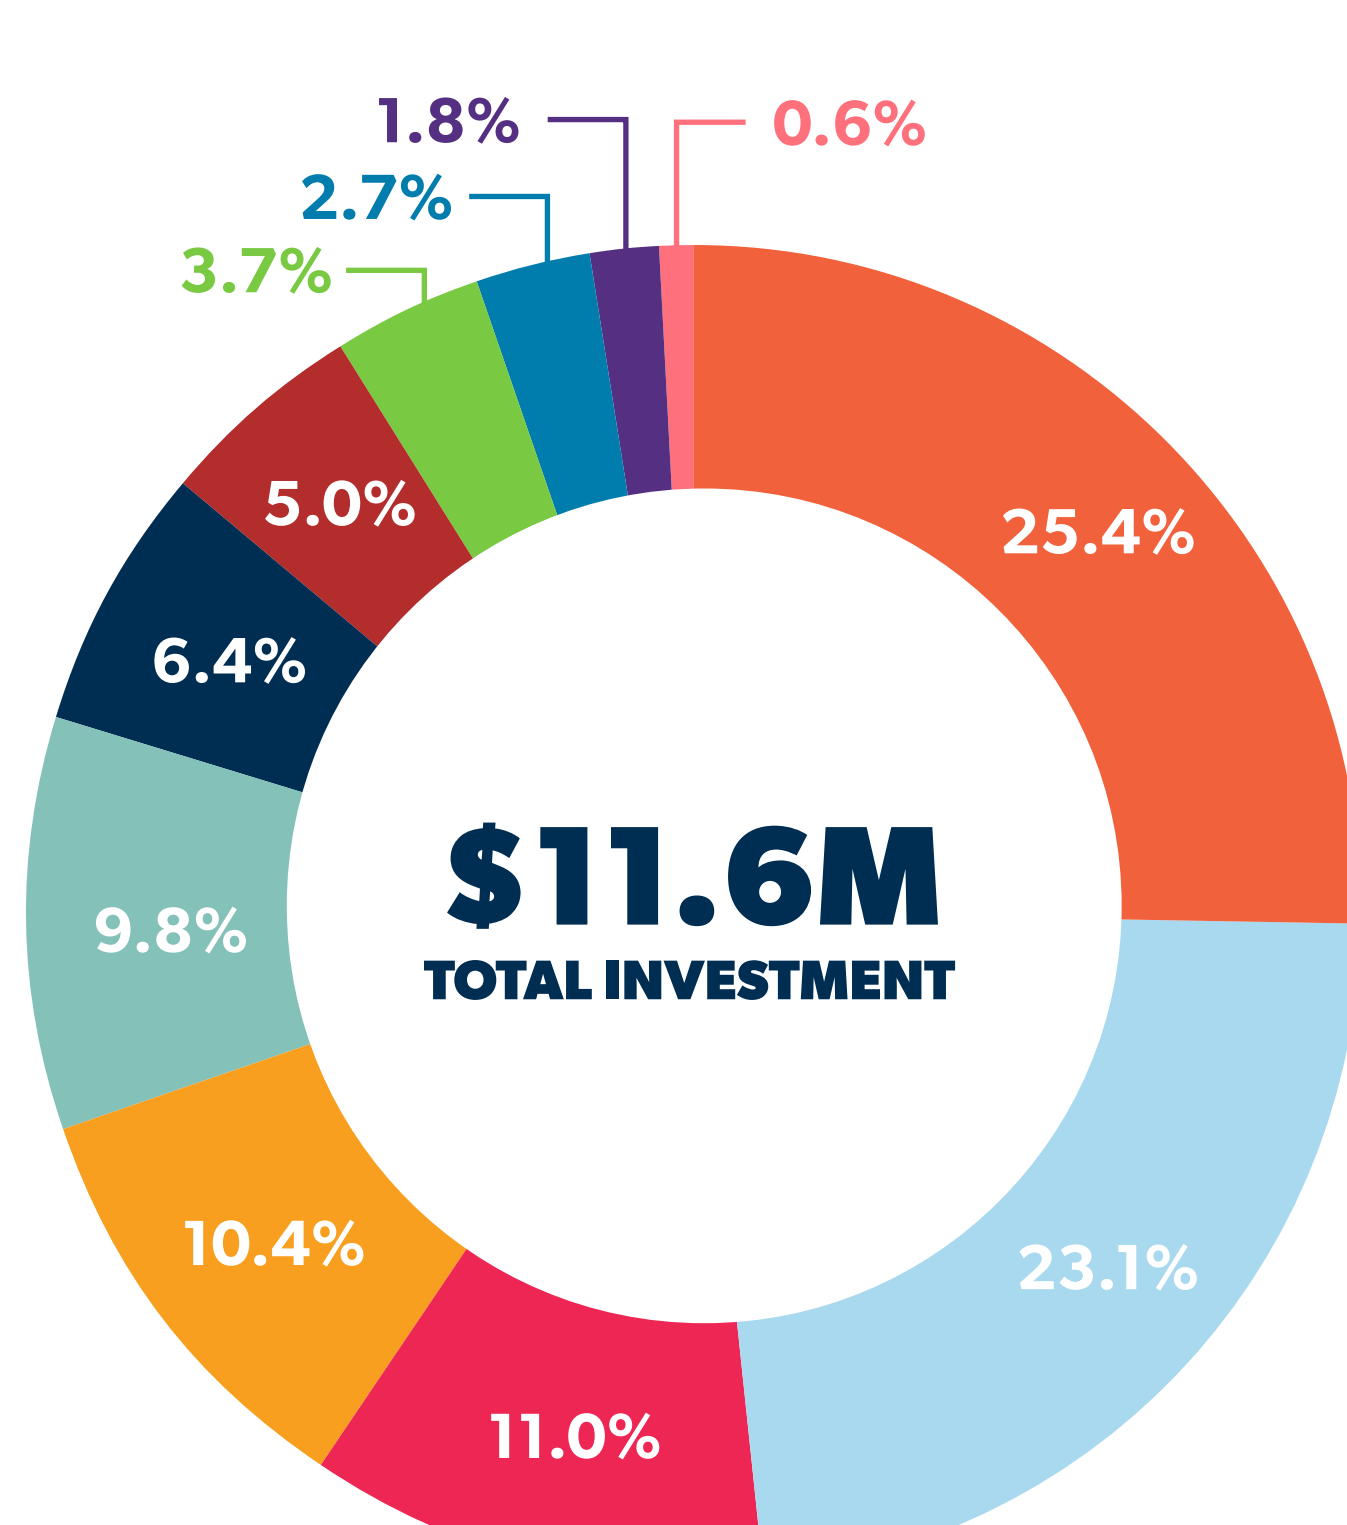

Digital Health & Discovery Platform

In the 2020-21 fiscal year, the Terry Fox Research Institute invested \$825K in the Digital Health and Discovery Platform, a pan-Canadian initiative that seeks to improve health outcomes for Canadians by deploying cutting-edge technologies that advance precision medicine. This project is funded under the Innovation, Science and Economic Development agreement with TFRI and is not reflected in any of the data provided here.

CANCER TOPICS†

Investment by Cancer Topic

Cancer Biology	\$3M
Precision Medicine	\$2.7M
Immunotherapy	\$1.3M
New Technologies	\$1.2M
Biobanking	\$1.1M
Cancer Metastasis	\$746K
Cancer Drugs	\$580K
Chemotherapy & Radiation	\$423K
Early Detection & Diagnosis	\$314K
Health Systems Research	\$214K
Cancer Prevention	\$71K

Number of Projects by Cancer Topic

Precision Medicine	20	Cancer Drugs	5
Cancer Biology	16	Chemotherapy & Radiation	3
Immunotherapy	10	Early Detection & Diagnosis	2
New Technologies	9	Health Systems Research	2
Biobanking	8	Cancer Prevention	1
Cancer Metastasis	7		

†Our projects are interdisciplinary by design and often apply to more than one cancer topic. Our investment per cancer topic is an estimation. The interdisciplinary nature of our projects also means that the number of projects by cancer topic should not be added, as their sum will be more than 44, the number of projects we currently fund.

YEAR-TO-YEAR COMPARISON

Year	Investment	Projects	Researchers	Institutions
2020-21	\$11.6M	44	385	94
2019-20	\$21.3M	46	472	98
2018-19	\$26.6M	47	435	95
2017-18	\$21.8M	52	361	81

The differences in numbers for projects, researchers and institutions between the fiscal years reflect new developments at TFRI as well as the regular changes that come with our annual research operations and funding cycles.

TFRI is now focused on creating an initiative to accelerate precision medicine, known as the Marathon of Hope Cancer Centres Network. In preparation for the launch of the new network, over the last year TFRI has funded pilot projects that bring together multiple institutions within a region. Additionally, as part of our operational cycle, some projects have been completed and their funding term has ended.

Our research investment total varies annually and is based on funds received from The Terry Fox Foundation and other funders in 2020-2021. Like most organizations, TFRI and TFF experienced a host of unprecedented challenges last year with the pandemic significantly affecting our annual research and fundraising operations.
