The differences in numbers for projects, researchers and institutions between the fiscal years reflect new developments at TFRI as well as the regular changes that come with our annual research operations and funding cycles. In addition to its legacy program, TFRI is now focused on operationalizing two innovative projects that embody Terry Fox's spirit and unite the country to improve the lives of cancer patients through precision medicine: the Marathon of Hope Cancer Centres Network (MOHCCN) and the Digital Health and Discovery Platform (DHDP). Additionally, as part of our operational cycle, some projects have been completed and their funding term has ended. Our

research investment total varies annually and is based on funds received from The Terry Fox Foundation and other funders.

Institute invested \$1,939,579.86 in the Digital Health and Discovery Platform. Key outcomes of this investment include the development of a Pan-Canadian data governance framework that protects individual privacy and will be validated through a pilot initiative. In parallel, communication and data strategies leading to the implementation of activities to educate, inform and engage the diverse group stakeholders, to build the DHDP network and target users to stimulate the commercialization of homegrown research discoveries.
